

Canola- 18 days after herbicide treatment

Pea crop sprayed at 5-node stage with herbicide and Active Build vs. herbicide-only check

Canola- 10 days after herbicide treatment with Active Build

Canola- 10 days after herbicide treatment

Canola- 14 Days After treatment

Active Build allows the plant to continue photosynthesizing during herbicide metabolism. Note the difference between the plants above. Active Build is healthy and green right to the ground.
